

EARLY MODEL

Quick Disconnect Materials came from United States Plastics Corp.
www.usplastic.com

Each disconnect is made up of two pieces: The valve body and the Insert

3/8" Fuel lines got dry break disconnects (when you break them they do not flow fuel): you need two complete units

#64157 3/8" Hose Barb PLC Series Acetal Body – Shutoff x 1

#64172 3/8" Hose Barb PLC Series Acetal Insert – Shutoff x 1

#65775 .571" Min. - .669" Max. Oetiker Stepless Ear Clamp x 4

1/4" Vent Line you need one complete unit, this is a straight through unit not a dry break:

#64648 1/4" In-line Hose Barb APC Series Acetal Coupling Body w/Shroud - Straight Thru x 1

#60466 1/4" In-line Hose Barb APC Series Acetal Male Insert - Straight Thru x 1

#65772 .425" Min. - .524" Max. Oetiker Stepless Ear Clamp x 2

1/4" Drain Line you need one complete unit, this is a straight through unit not a dry break:

#64648 1/4" In-line Hose Barb APC Series Acetal Coupling Body w/Shroud - Straight Thru x 1

#60466 1/4" In-line Hose Barb APC Series Acetal Male Insert - Straight Thru x 1

#65772 .425" Min. - .524" Max. Oetiker Stepless Ear Clamp x 2

1/8" Vacuum Line you need one complete unit, this is a straight through unit not a dry break: :

#64613 1/8" Hose Barb PMC Series Acetal Body - Straight Thru x 1

64167 1/8" Hose Barb PMC Series Acetal Body - Straight Thru x 1

No Clamps required

If the black drain or vent line hose on your bike is missing, deteriorated, hard consider replacing with new hose

8ft of # 57239 1/4" ID x 3/8" OD x 1/16" Wall Versilon™ R-3400 UV Resistant Tubing is enough to replace both drain lines
